Unlock the power of Video Analytics: Bosch Plug-in Suite for Genetec
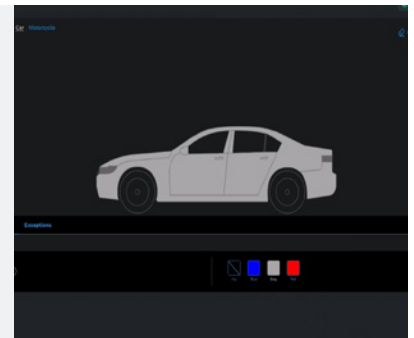

Effortlessly search and analyze vast video data with AI-powered speed and precision

Intelligent search: find what you need, instantly

Attribute Search: Quickly search across multiple cameras using metadata from Bosch IVA Pro. Find persons, vehicles (including make, model, license plate, and color), and more, depending on your license.

Forensic Search: AI-powered algorithms eliminate time-consuming manual searches, pinpointing critical incidents in seconds.

Benefits: Faster investigations, improved efficiency, and reduced operational costs.

Effortless integration & configuration

Seamless and secure integration: Works perfectly with your existing Genetec Security Center system. (5.11+). Configuration in an end-to-end secure environment.

Single installer: Easy setup and deployment. No other hardware required.

One frontend: Configure Bosch Video Analytics directly within Genetec Security Center – no additional tools needed.

Fully compatible: It works with all Bosch cameras that have Video Analytics.

Free of charge: Maximize your existing investment.

Solutions for every security need

Improve security across various sectors: cities, government facilities, commercial buildings, airports, traffic management, education, energy & utilities, and public transportation.

Tailored solutions for diverse challenges: utilize IVA Pro Buildings, Perimeter, Traffic, PPE, Appearance, and LPR/Make Model licenses to meet your specific requirements.
